

The perfect solution for repayment success!

LoanTracker® is the foremost student loan portfolio management platform.

Elements

Secure, web-based platform for in-house or outsourced default prevention

- Organizes student loan and borrower data from all sources into a single record
- Informative dashboard with click and view functionality
- Real time updates of borrower information, loan status and default prevention activities
- 99% accuracy of cohort default rate (CDR) projections
- Set and track cohort goals by year and campus
- Analysis of repayment rates and forbearance usage
- Automated Incorrect Data Challenge (IDC) macro
- Mail-merge functionality to support mass letter and email campaigns
- Flexible outreach options: manually, through assigned workgroups or by using the dialer system integration
- In-depth reports in real-time, on-demand and in multiple formats (PDF, Excel or CSV)

Benefits

- Time and resource savings
- Increase productivity and results
- Sophisticated data in a simplified format
- Flexibility for a more proactive approach - import 3 or 5 cohort years
- Advanced analytics and institutional trends help focus borrower support and strategic planning.
