

## Career-Connected Literacy

By leveraging AI and today's most advanced technologies, Beable has pioneered Career-Connected Literacy—connecting literacy growth to workforce readiness. Now, for the first time, students get a personalized path to the “finish line”—to literacy proficiency and gainful employment—no matter where they start. They engage deeply in learning and take accountability for their success. They explore careers at their reading level and in their language, envisioning their future possible selves as they do. Career-Connected Literacy is not just a game changer, it's a life changer.

## Ongoing Academic Success

Beable transforms remediation from a barrier into a springboard. By delivering literacy instruction precisely at each learner's reading level—with adaptive scaffolds and time-on-task forecasting—students accelerate more quickly into credit-bearing courses and stay engaged through completion. Colleges see measurable gains in retention, persistence and degree attainment as learners achieve the foundational skills needed to progress and graduate.

## Navigation and Aspirational Motivation

Beable connects literacy acceleration to each student's career interests, helping them see the direct link between reading growth and their professional goals. This “why” behind the work fuels motivation, improving attendance, course completion and long-term engagement. Colleges benefit from higher student satisfaction, stronger workforce alignment and improved post-completion success metrics that demonstrate the value of their programs.

## Easy Implementation. Rapid Results.

Beable is an easy lift—designed to dovetail seamlessly with programs already in place or stand alone as a powerful literacy accelerator. Colleges see rapid results as students engage quickly and make measurable gains. Beable supports your implementation every step of the way, providing up-front consultation and ongoing partnership to ensure the rollout is easy, effective and impactful. It also provides access to high-quality, in-demand courses, programs and certifications.

# The Only Career-Connected Literacy Platform

Beable intertwines literacy acceleration and career exploration with personal growth and academic rigor, all in a single system.

- Beable’s Learner Record continually collects a wide range of student information, including personal and career interests (based on RIASEC survey data), accomplishments, gaps and goals—powering a highly personalized learning experience.
- A fully computer adaptive Lexile assessment system gives learners a better basis for growth.
- Establishes a more precise starting level.
- Learners take the assessment only one time.

Enables learners to “find their why” by exploring careers that match their interests, learning the literacy demands of these careers and motivating learners to give us the time on task required to accelerate skills.

- Combines two essential languages—Lexile and RIASEC—to enable students to make the literacy-to-career connection.
- Personalized career exploration based on their RIASEC codes at students’ just-right reading level enables them to “find their why.”

- Meets learners where they are and knows where they need to go through Beable’s unique and proprietary Forecaster and Accelerator tools.
- Forecaster: Gives faculty and advisers real-time insight into how much time and support each student needs to reach their learning and career goals. Tracks engagement and skill progress across the college, helping identify where to focus resources to best support students who need extra help or additional challenges.
- Accelerator: Delivers college-level course content automatically adapted to each student’s reading and skill level (10 versions per lesson, from 200L to 1300L). Includes built-in vocabulary and study supports, videos and extra practice time to ensure every learner can access the same material and progress at their own pace.

## About Beable

Beable is the Career-Connected Literacy company. Beginning with middle school and high school, Beable is providing a ground-breaking Career-Connected Literacy System. Powered by its BeableIQ data and automation engine, Beable accelerates literacy growth while connecting it directly to grade-level content acquisition, ACT/SAT prep, career exposure and ultimately, lifelong success for students.
