

ACADEUM

Acadeum Course, Program and Skills Sharing

Colleges and universities can quickly expand academic portfolios with in-demand certifications, courses and programs to attract and retain learners along the education-career continuum.

Student Need

- **6 in 10** students have difficulty enrolling in required courses
- **1 in 5** students say they may stop attending their institution if they cannot enroll in needed courses
- **42%** of students who frequently struggle to find courses say they will stop attending if they remain unable to enroll

These challenges impact retention, **degree progress, and institutional stability.**

Improving the Student Experience

Acadeum connects institutions through an academic sharing network that provides:

- Access to **high-quality in-demand courses, programs and certifications**
- A **seamless exchange of data and payments** between institutions

- The ability for institutions to support students when internal course capacity is limited

Impact

- **70,000+** unique students served
- **100,000+** course share registrations
- **95%** completion rate among participating students

Course-Sharing Journey

A student needs a course for degree progress.

- **Home institution advisors/registrars** recommend or approve a pre-approved course
- **Teaching institution** accepts the student, creates an account, provides the course and sends the final grade back to the home institution

Use Cases

- Students out of sequence, wait listed or facing course bottlenecks
- Grade replacement (DFW)
- Midterm or emergency scheduling fixes
- Maintaining athletic or financial aid eligibility
- Avoiding leaves of absence due to conflicts

(continued on back)

- Covering faculty sabbaticals or medical leave
- Launching new programs quickly to meet workforce needs
- Supporting program teach-outs or saving low-enrollment programs
- Enhancing offerings for adult learners and degree completion pathways

About Acadeum

Acadeum helps colleges and universities quickly expand academic portfolios with in-demand certifications, courses, programs and degrees to attract and retain learners along the education-career continuum. More than 500 higher education institutions use the Acadeum network and technology platform to expand academic capacity, helping to keep learners on track to graduation, generate and recover revenue, bolster existing or launch new programs and attract new populations of learners with workforce-aligned curricula and stackable certifications.
